

Biography

Wang Guoyu

Global Transportation Business Unit President

Enterprise BG

Huawei Technologies Co., Ltd.

Mr. Wang Guoyu is the President of the Global Transportation Business Unit, Huawei Enterprise BG. He manages the planning and design, integrated verification, as well as ecosystem development of Huawei's transportation industry solutions. He and his teams are committed to providing end-to-end innovative ICT solutions for customers in the aviation, rail, and roadway industries.

Mr. Wang has nearly 20 years of ICT research, solution planning, and design experience in the transportation industry. He has taken part in dozens of key projects, such as the Dubai Airport data center, Changi Airport video surveillance, and a railway network project for Australia's PTA. He has also led digital transformation projects for major transportation industry customers, including Shenzhen Airport and Shenzhen Metro, during which he gained a deep understanding of business models and the industry's ICT technology trends.

Mr. Wang is an academic expert of various industries: He is a member of the rail transportation committee of China Civil Engineering Society, and of the high-speed railway committee of China Railway Society.
