Hello BreachedForums!

Today I'm leaking data of a cybersecurity company called Acronis! 🤪

Acronis

According to wikipedia:

Quote:

Acronis International GmbH, simply referred to as Acronis, is a Swiss technology company with its corporate headquarters in Schaffhausen, Switzerland and global headquarters in Singapore. Acronis develops on-premises and cloud software with unique integration of backup, disaster recovery, cybersecurity, and endpoint management. Acronis has 18 offices worldwide. Its R&D centers, Acronis Labs, are based in Bulgaria, the United States and Singapore. Acronis has 49 cloud data centers around the world, including the United States, France, Singapore, Japan, and Germany.

Additionally:

- the company provides backup software for various companies
- they have over 2000+ employees
- they have a revenue of over \$120 million USD
- they also have dogshit security with the slogan "All-in-one Cyber Protection". Pretty ironic lol.

The leak contains:

- various certificate files
- various command logs
- system configurations
- system information logs
- archives of their filesystem
- python scripts for their maria.db database
- backup configuration stuff
- loads of screenshots of their backup operations

Samples

LINK:

<https://cdn.breached.vc/share/acronis.tar.gz>

REASON FOR THE BREACH:

i was bored so i just decided to humiliate the fuck out of them. Simple as that.

Hello,

Kindly post writeups like Phineas Phisher.

I'm not obligated to share it. Also both of you reek of being the same person.

my hacks 🕶️
